

BOILER SAFETY INTERPRETATION/TECHNICAL LETTER
BSI02

MEMORANDUM

TO: All Inspection Agencies & Supervisors

FROM: Fred P. Barton, Director/Chief Inspector
Boiler Safety Compliance Program

SUBJECT: Back to Basics

DATE: February 14, 2000

In our memorandum of January 4, 2000 it was announced that there would be a meeting in the spring of representatives of all inspection companies providing certificate inspections in Virginia. The purpose of that meeting is to discuss subjects of common concern.

Arrangements have been made to hold the meeting on April 27, 2000 from 9:00 am to 11:30 am at Virginia Power's Engineering Center located in Innsbrook.

The Virginia Power's Innsbrook Facility is located North-West of Richmond. Take I-64 coming East or West and exit on 178-B. This is Route 250 (Broad Street) you will need to get in far left hand lane after the exit. Go to the first traffic light and turn left onto Dominion Boulevard. This goes right to Virginia Power. At the "Y" intersection go left toward the parking lot. Walk to the door which is under the microwave tower on top of the building.

The following subjects will be presented for discussion:

- a. Introduction/Audit Results – Fred Barton
- b. Lack of reporting replaced equipment – Edward Hilton
- c. Duplicate Virginia Numbers – Edward Hilton
- d. Unregistered equipment located near registered equipment – Stephen Tynes
- e. Exemptions – Fred Barton
- f. Electric Boiler/Steam Generators – Fred Barton
- g. Internal Inspections – Fred Barton

It is requested that a representative of every inspection company doing business in Virginia attend this important meeting to address some longstanding basic issues. Both supervisors and inspectors are encouraged to attend. Bring your copy of the 1999

Edition of the Virginia Boiler Rules and Regulations and the 1998 Edition of the NBIC with you. Any company who cannot attend should promptly notify me with an explanation in writing.

We look forward to meeting everyone on April 27th. Hopefully, at the conclusion of this meeting there will be a better understanding of the Virginia Boiler Rules and how we can work together better.
